

RECYCLE MORE AND BETTER

Here are simple and effective sorting practices, which can be adopted right away!

- Is the object I want to put in my recycling bin made of paper, cardboard, plastic, glass or metal?
- Is the object a container, packaging or printed matter?

If the answer to one of these questions is no, then your item might belong in a **thrift store**, an **eco-centre**, a **composting facility** or some participating retailers.

Place shredded paper in a transparent plastic bag

Place bags and soft packaging films in one properly tied bag (a bag of bags)

Recycle only bags/films that stretch when you try to tear them

Close the lid of your bin in order to protect its content from bad weather

Put caps on plastic bottles
